
By ZIP Code: Number of Children under Age 18
with a Social Security Number Who Are Not Found
on a Tax Year 2019 or 2020 Tax Return but who
Appear on a Tax Year 2019 Form 1095 and
Associated Number of Policy Holders

Department of the Treasury
June 2021

Notes: [1] This table shows, by ZIP Code, the number of children who may be eligible to be claimed for the expanded and newly-advanceable Child Tax Credit from the American Rescue Plan but who had not been claimed on a recent tax return. Specifically, this table shows, by ZIP code, the weighted number of (1) children under age 18 with a social security number who are not found on a processed Tax Year 2019 or 2020 tax return at the time of tabulation, May 27, 2021, but who appear as a covered individual on a Tax Year 2019 Tax Form 1095 health insurance series information return; and (2) Form 1095 recipients or "policy holders" with the aforementioned children. Note that policy holders could have filed a Tax Year 2019 or 2020 return. Further, this analysis is not exhaustive, as there may be children eligible for the Child Tax Credit who do not appear on recent tax records.

[2] Children may appear on multiple Tax Form 1095s. For example, suppose each parent has health insurance through their employer. Their child could be a covered individual on each insurance policy and therefore appear on the Form 1095 that each parent receives from their employer.

[3] Policy holders may appear on multiple Tax Form 1095s. For example, an individual may change employers during the year and have health insurance coverage at each employer. Both employers may issue the individual a Form 1095.

[4] Weighted counts are provided to avoid double-counting children and policy holders who appear on multiple Tax Form 1095s. For example, a child who appears on a Form 1095 of a policy holder whose address has a ZIP Code of XXXXX and on two Form 1095s of a policy holder whose address has a ZIP Code YYYYY would receive a weight of 1/3 in Zip Code XXXXX and 2/3 in Zip Code YYYYY. The same method is applied to policy holders who appear on multiple Form 1095s. The weighted totals have been rounded.

[5] Tax Form 1095 is a series of three forms issued by three different groups of entities involved in health insurance: Form 1095-A (Health Insurance Marketplaces), Form 1095-B (insurance providers); and Form 1095-C (certain large employers). Health Insurance Marketplaces must file Form 1095-A to report information on all enrollments in qualified health plans in the individual market through the Marketplace. Every insurance provider that provides minimum essential coverage to an individual during a calendar year must file a Form 1095-B return reporting the coverage. This includes, among others, group health insurance coverage and government-sponsored programs such as Medicare Part A, Medicaid, the Children's Health Insurance Program (CHIP), the TRICARE program, and coverage administered by the Department of Veterans Affairs. Employers with 50 or more full-time employees (including full-time equivalent employees) in the previous year are required to use Form 1095-C to report the information about offers of health coverage and enrollment in health coverage for their employees. Some employers below this employee threshold submit a Form 1095-C. Self-insured group plans can report coverage information on Form 1095-C or Form 1095-B.
